## Options For Shipped Semen

**CHILLED SEMEN** – can be successfully used with vaginal, trans-cervical or surgical inseminations.

Semen is collected and extended. It is shipped on ice in a special insulated box. The cost of chilled semen processing is \$265.00 and includes shipping in the USA.

\*\*\*\*Please call for Foreign Shipment estimates\*\*\*\*

**FROZEN SEMEN** – We recommend either a trans-cervical or surgical insemination with frozen semen.

Frozen semen is sent in a special tank that keeps the semen frozen during transit. You should check to see if your veterinarian has the facilities to store frozen semen before having it shipped.

The cost of the frozen semen shipment/processing is \$545.00, which includes; semen and tank preparation, and 2-way shipping via FedEx. The frozen semen and extender is prepped and transferred into a shipping tank, and all necessary paperwork is provided in the shipment. We require a credit card authorized to be filled out prior to shipment for payment. A deposit of \$1200.00 is required for the shipping tank – the card will not be charged the deposit fee unless the tank is lost or damaged. (For Domestic Shipments only).

\*\*\*\*For International Shipments, please contact our office for assistance\*\*\*\*

### **NOTE:**

A Stud Fee will most likely be charged by the stud dog owner in addition to the prices quoted above. It is not uncommon for a stud dog owner to charge fees, in addition to the stud fee, for frozen breeding units. Stud Fees are between the stud dog owner and the bitch owner, and should be handled privately before any semen is collected and/or shipped.

### **ALL SEMEN IS SENT VIA FEDERAL EXPRESS**

We can use your credit card or Fed Ex account number for shipping. If you'd like to inquire about shipping prices, please contact Federal Express directly. Frozen semen tanks weigh approx. 30 lbs. They are round, 16" wide and 23" tall.
